Web Developer

I am a Web Developer capable of creating complete web applications from scratch. My interest in web development began in 2015 when I began my studies as a Software Engineer. I am knowledgeable about a wide range of web and internet technologies. I have a passion for creating resilient, scalable, and maintainable software, and I am excited to improve the experiences of the users. I am meticulous, and have a lot of attention to detail, especially when working with design specifications. Currently, I am looking for an opportunity to develop my career as a Professional Web Developer, being part of a company that allows me to apply everything I have learned so far and continue growing both personally and professionally to achieve the greatest possible results.

WORK EXPERIENCE

UEB Network Applications   **Cuba**
Dec 2021 - Oct 2023

Web Developer
- Collaborated with the development team to design, develop, and maintain web applications.
- Implemented responsive and user-friendly front-end designs using HTML5, CSS3, JavaScript, and ReactJS.
- Maintained databases and performed database SQL queries for data retrieval and manipulation.
- Wrote clean, modular, and efficient code for front-end and back-end components.
- Participated in code reviews and provided constructive feedback.
- Fixed and debugged issues to ensure optimal performance and user experience.
- Learned client's line of business and proposed new solutions to problems.
- Collaborated with the development team with close communication through GitLab in some projects, and GitHub in others.
